Our Expertise & Commitment

Claris Clinic is now recognised as a leading name in aesthetic medicine and surgery in Belgium.

Our success rests on a team of experienced and passionate professionals. From the initial consultation through to post-treatment follow-up, we are committed to providing attentive, personalised care, ensuring that every patient feels heard, supported, and valued.

“ At Claris Clinic, our personalised approach allows us to truly understand each patient's needs. This enables us to deliver the highest standard of treatment and achieve results that are widely recognised for their quality and excellence.

DR CHRISTINE WALRAVENS
PLASTIC SURGEON

“ Since joining Claris Clinic, I have witnessed first-hand the real impact of the personalised care and innovative treatments we provide. Our approach, centred around each patient's unique needs, makes a meaningful difference every day. I am proud to be part of such a committed and passionate team.

LARISSA REUL
AREA MANAGER

“ Working at Claris Clinic means collaborating closely with an expert and dedicated team. Our treatment approach is built on meticulous attention, advanced technology, and shared expertise, creating a patient journey that is both unique and rewarding.

ORIANE DE BREUCKER
LEAD NURSE

DID YOU KNOW?

Claris Clinic is one of the very few clinics in Belgium to offer a comprehensive range of treatments designed to rejuvenate, enhance and reshape the face and body. Whether through surgery or less invasive techniques such as injectables and laser treatments, we help each patient choose the solution best suited to their needs.

Book your consultation and discover a personalised approach to natural beauty.

Tailored Treatments

The Three Claris Clinic Specialties

Our team will guide you through every step of the process to ensure the best possible results.

| Hair Restoration

Aesthetic Surgery

| Breast surgery

| Facial surgery

| Body contouring

| Abdominal surgery

Breast Surgery

We respect your morphology and aim for minimal scarring to ensure natural results. Our goal is to help you rediscover your confidence.

Breast Augmentation

Do you feel that your breasts are too small, asymmetrical, sagging, or have changed following pregnancy or over time? If these concerns affect your confidence, natural and long-lasting aesthetic solutions are available.

Breast augmentation is one of the most sought-after procedures in aesthetic surgery, and thorough preparation is an essential part of the process. During your consultation, we will guide you through the different implant options, surgical techniques, expected outcomes, and potential risks.

- **Duration:** approx. 45 to 60 minutes under general anaesthesia
- **Recovery:** approximately 10 days
- **Results:** immediate
- **Final appearance:** 3 to 4 months
- **Scars:** approximately 3 cm

FROM €4,955

Indicative pricing — varies according to the procedure.

Breast Lift (Mastopexy)

Over time, the breasts can lose firmness and shape. A breast lift helps restore a firmer, more harmonious contour that complements your natural silhouette. Beyond the aesthetic benefits, the procedure can also improve everyday comfort and confidence.

- **Duration:** 2 to 3 hours under general anaesthesia
- **Recovery:** approximately 2 weeks
- **Results:** lifted, firmer breasts
- **Final appearance:** a few months
- **Scars:** initially visible, gradually fading over time

FROM €5,350

Indicative pricing — varies according to the procedure.

Breast Reduction

Do you experience back, shoulder or neck pain due to the size of your breasts? Do physical activities feel uncomfortable, or do you feel self-conscious about your figure? Breast reduction surgery may offer an effective solution.

This procedure reduces breast volume while correcting sagging or asymmetry, creating a more balanced and harmonious silhouette that remains proportionate to your body.

- **Duration:** 2 to 3 hours under general anaesthesia
- **Recovery:** approximately 2 weeks
- **Results:** immediate
- **Final appearance:** a few months
- **Scars:** initially visible, gradually fading over time

FROM €5,350

Indicative pricing.

Breast Lipofilling (Fat Transfer)

Breast lipofilling is a natural breast enhancement technique that uses your own fat to restore or increase breast volume. In selected cases, it can offer a natural alternative to traditional breast implants.

- **Duration:** 1 to 3 hours under general anaesthesia
- **Recovery:** 4 to 7 days
- **Results:** definitive after 3 to 6 months, once the transferred fat has stabilised

FROM €6,450

Indicative pricing.

Gynaecomastia

Gynaecomastia is the abnormal development of breast tissue in men, which can be corrected through a relatively simple surgical procedure. It aims to restore a flatter, firmer chest, and is performed either through liposuction or glandular resection.

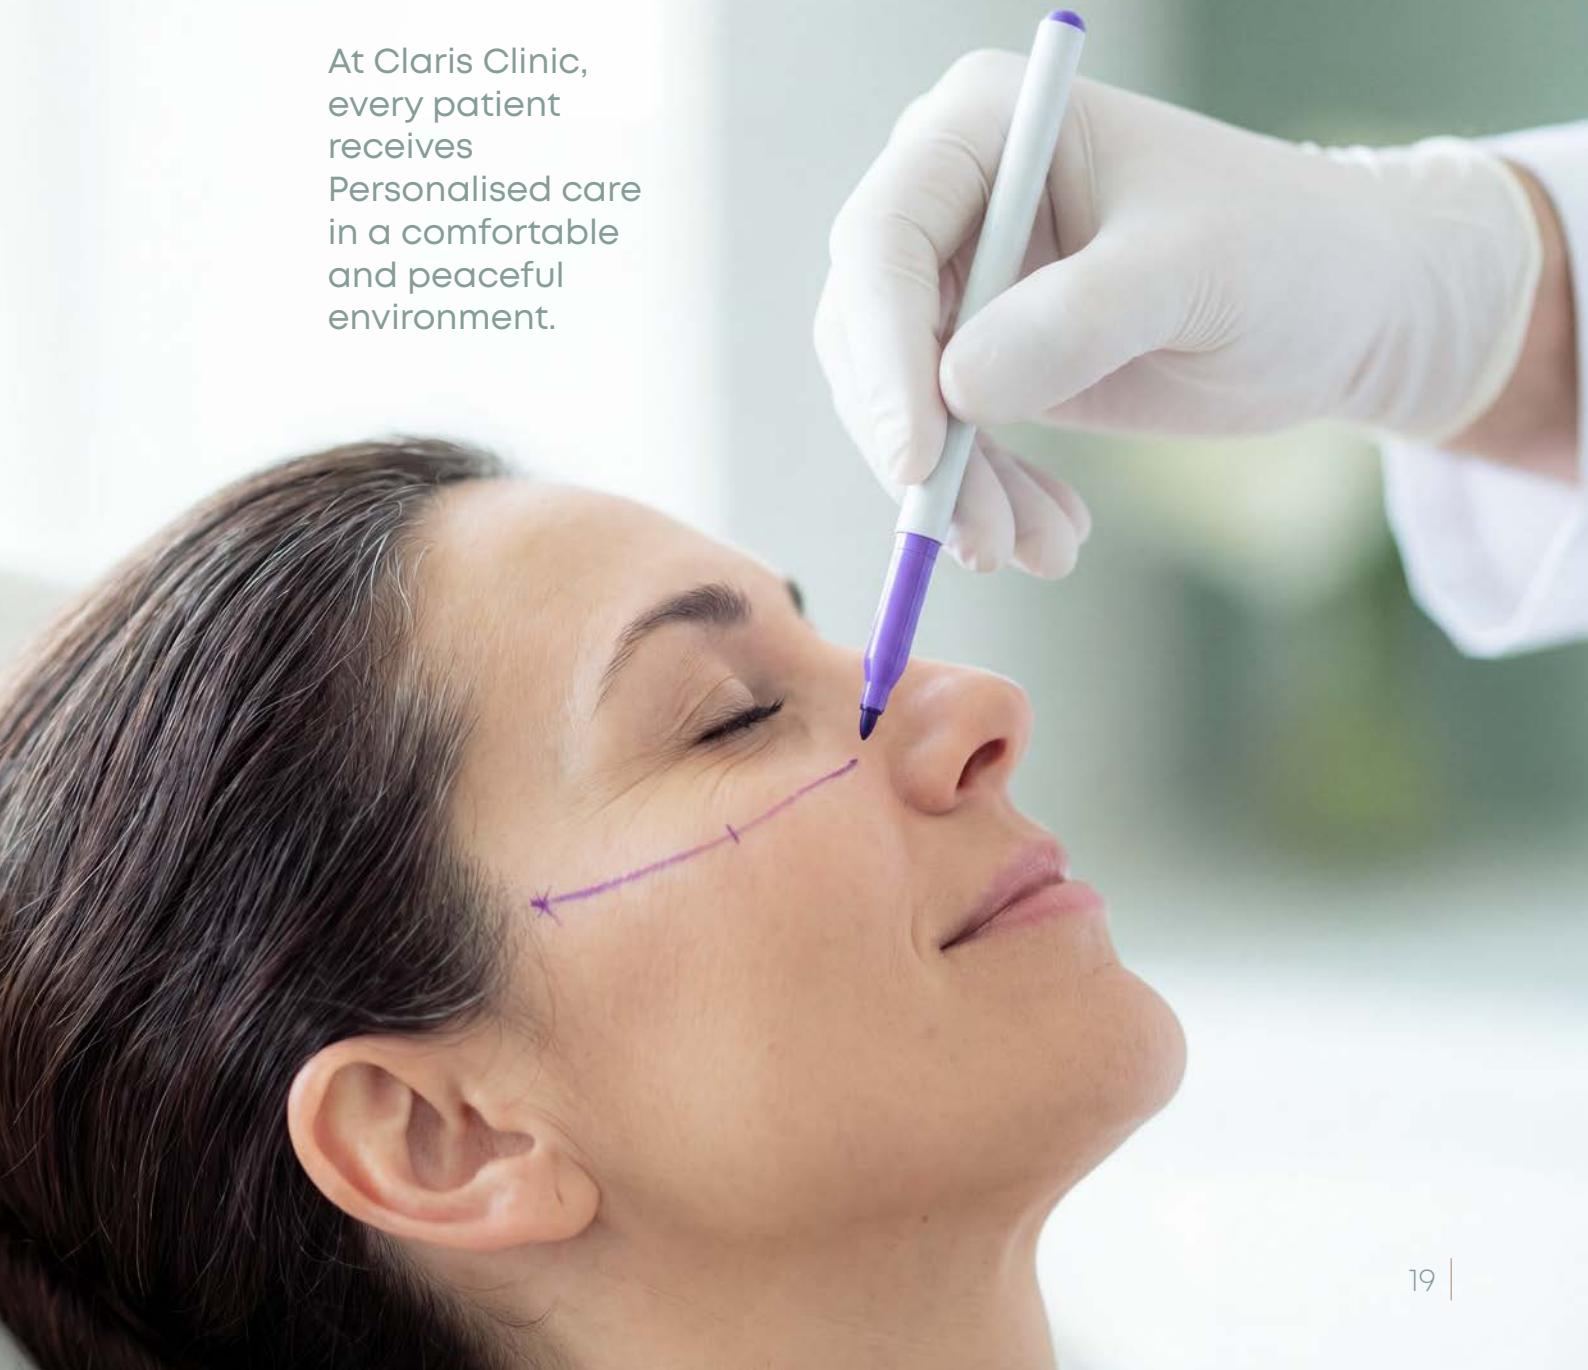

- **Duration:** 1 to 3 hours under general anaesthesia
- **Recovery:** approximately 2 weeks
- **Results:** long-lasting and definitive

FROM €3,250

Indicative pricing.

At Claris Clinic,
every patient
receives
Personalised care
in a comfortable
and peaceful
environment.

Facial Surgery

Our facial procedures aim to delicately redefine selected areas to restore natural facial harmony.

Blepharoplasty

Drooping eyelids can make the eyes appear tired, heavy or sad and are often associated with visible signs of ageing. Blepharoplasty helps restore a brighter, more refreshed and rejuvenated appearance.

This minimally invasive procedure restores a fresher, more rested appearance to the eyes while preserving natural-looking results. Depending on your needs, it can be performed on the upper eyelids, lower eyelids, or both together.

- **Duration:** 1 to 2 hours under local or general anaesthesia
- **Recovery:** 1 to 2 weeks
- **Results:** immediate and definitive for under-eye bags
- **Final appearance:** 3 to 6 months
- **Scars:** discreet and fading after a few months

FROM €1,850

Indicative pricing — varies according to the procedure.

Face & Neck Lift (Cervicofacial Lift)

The cervicofacial lift offers an effective solution for correcting visible signs of ageing such as wrinkles, fine lines, and skin laxity. This procedure addresses sagging skin and underlying tissues to restore a firmer, more youthful appearance to the face and neck.

- **Duration:** 2 to 4 hours under general anaesthesia
- **Recovery:** 1 to 2 weeks with swelling and bruising
- **Final appearance:** 2 to 3 months
- **Scars:** significantly softened after 6 months
- **Longevity:** 10 to 12 years

FROM €7,450

Indicative pricing — varies according to the procedure.

Neck Lift

A neck lift is a surgical procedure designed to rejuvenate the neck and jawline. It is intended for patients experiencing visible signs of ageing in this area.

- **Duration:** 1 to 3 hours under general anaesthesia
- **Recovery:** 7 to 10 days
- **Results:** after a few months
- **Longevity:** 10 to 15 years

FROM €4,250

Indicative pricing — varies according to the procedure.

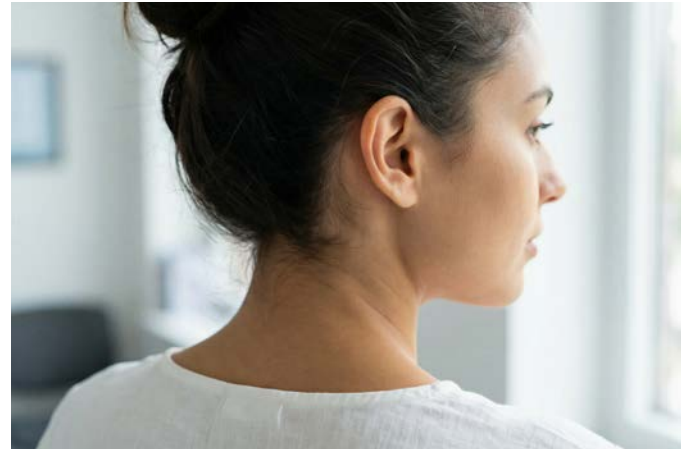

Lip lift

A lip lift is a surgical procedure that shortens the space between the nose and the upper lip to restore balance and harmony to the face.

- **Duration:** 30 minutes under local anaesthesia
- **Recovery:** approximately one week
- **Results:** permanent, visible after a few weeks

FROM €2,190

Indicative pricing — varies according to the procedure.

Otoplasty

Otoplasty is a surgical procedure designed to correct prominent ears.

- **Duration:** approximately 1 hour under local or general anaesthesia
- **Recovery:** approximately one week
- **Results:** visible after a few weeks

FROM €1,850

Indicative pricing — varies according to the procedure.

Rhinoplasty

Rhinoplasty is a surgical procedure to modify the appearance of the nose. It can be performed for aesthetic or functional purposes.

- **Duration:** 1 hr 30 min to 2 hr 30 min under general anaesthesia
- **Recovery:** 10 days
- **Results:** after 6 to 12 months

FROM €5,690

Indicative pricing — varies according to the procedure.

Buccal Fat Removal

Buccal fat removal is a surgical procedure that reduces the natural fat pads located in the cheeks to refine facial contours. The result is a more sculpted and defined appearance.

- **Duration:** approximately 30 minutes under local anaesthesia
- **Recovery:** approximately one week
- **Results:** visible after a few weeks

FROM €2,490

Indicative pricing — varies according to the procedure.

Body Contouring Surgery

Whether the goal is to refine, reshape or restore volume, every procedure is carefully designed to create a more balanced silhouette in harmony with your natural proportions.

Liposuction

Despite a balanced diet and regular exercise, certain areas of the body may remain resistant and continue to retain stubborn fat deposits. Liposuction offers an effective solution by removing these localised areas of fat to refine and reshape the silhouette.

- **Duration:** 1 to 3 hours under general anaesthesia
- **Target areas:** abdomen, thighs, outer thighs, hips, arms, back, knees, chin and neck
- **Recovery:** 7 to 10 days
- **Results:** a few weeks
- **Final appearance:** 3 months
- **Scars:** small (approximately 2–4 mm incisions) for cannula entry points

FROM €3,695

Indicative pricing — varies according to the procedure.

Important: liposuction is not intended for weight loss. Its purpose is to reshape and contour the body rather than reduce body weight. It is a body contouring procedure and is not designed to treat excess weight or cellulite.

Abdominoplasty (Tummy Tuck)

Abdominoplasty is a surgical procedure that reshapes the abdomen by removing excess skin and fat while restoring the muscular function of the abdominal wall.

- **Duration:** 1 hr 30 min to 3 hours under general anaesthesia
- **Recovery:** 2 to 3 weeks
- **Results:** after several months, once swelling has fully resolved

FROM €4,350

Indicative pricing — varies according to the procedure.

Arm Lift (Brachioplasty)

The arm lift, or brachioplasty, is a surgical procedure that reshapes the inner arms by removing excess skin to create a firmer, more toned appearance.

- **Duration:** 1 to 2 hours under general anaesthesia
- **Recovery:** 4 to 6 weeks
- **Results:** after several months, once swelling has fully resolved

FROM €4,950

Indicative pricing — varies according to the procedure.

Aesthetic Medicine

| Injections

| Skin treatments

| Body

Injectables

Injectable treatments can rejuvenate and enhance the face while preserving natural-looking results. They smooth wrinkles, soften folds and restore volume, without surgery or lengthy recovery times.

Botulinum Toxin or Hyaluronic Acid: what is the difference?

Many people confuse Botox® (botulinum toxin) with hyaluronic acid, although they work in very different ways. They have distinct properties and are used for different purposes, even if they are often complementary and share the same goal of rejuvenating the skin.

The summaries below clarify how each works.

Botulinum Toxin

Definition a substance derived from the bacterium Clostridium botulinum, used to temporarily relax targeted muscles.

Main indications

- smoothing expression lines
- lifting the eyebrows

Procedure intramuscular injection

Onset & duration results appear within a few days; effect lasts approximately 6 months

FROM €170 - €390

Understanding the mechanism of action of botulinum toxin

Hyaluronic Acid

Definition a molecule naturally present in the skin, which is known for its hydrating properties and its ability to support skin structure and elasticity.

Main indications

- restoring volume
- filling wrinkles and fine lines
- hydrating the skin
- restoring radiance

Procedure intradermal injection

Onset & duration immediate; effect lasts 6 to 18 months

FROM €350

The Mid-Face Technique

Lip Injections

Lip injections refine the contours of the lips, gently enhance volume and restore hydration to the lips for a natural, harmonious result. The goal is never to transform, but to enhance your features while preserving overall facial harmony.

- **Duration:** 30 to 45 minutes, using topical anaesthesia (cream)
- **Recovery:** immediate; mild tenderness for 24 to 48 hours
- **Results:** visible from day 3 to 5; usually lasts 6 to 12 months

FROM €350

Indicative pricing – varies according to the procedure.

Facial PRP (Platelet-Rich Plasma)

PRP (platelet-rich plasma) is an innovative treatment that uses your body's own blood components to stimulate skin regeneration. As a natural and minimally invasive treatment, it involves very few side effects and may offer an alternative to filler injections such as hyaluronic acid.

Indications:

- Restoring radiance from the age of 25 onwards
- Skin rejuvenation for the face, neck, décolletage and hands
- Treating dark under-eye circles
- Improving the appearance of scars

- **Duration:** 30 to 40 minutes under local anaesthesia
- **Procedure:** standard blood sample and plasma extraction
- **Results:** visible after 1 to 3 sessions, lasting several months

FROM €395 3-SESSION PACKAGE: €1,095

Indicative pricing — varies according to the procedure.

Skin Boosters

Skin Boosters are an aesthetic medicine solution designed to improve the quality and texture of the skin. The treatment hydrates the skin and stimulates the production of collagen, offering effective, lasting rejuvenation.

- **Duration:** 30 minutes
 - **Recovery:** immediate
 - **Results:** effects can last up to 6 months.
- For optimal results, a series of 2 to 3 sessions spaced 4 weeks apart is generally recommended

FROM €320

Indicative pricing — varies according to the procedure.

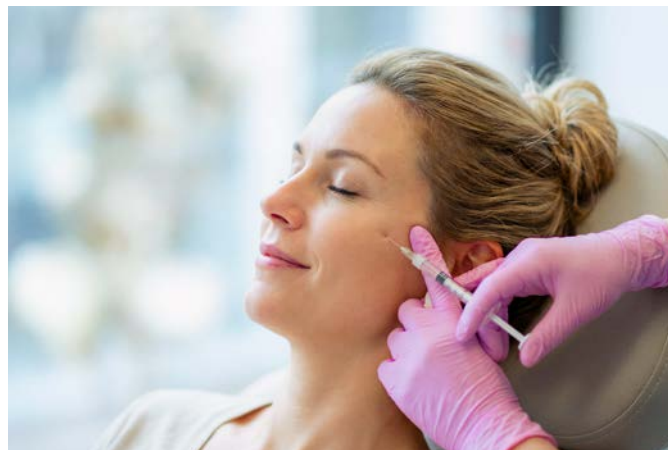

Radiesse®

Radiesse® is a dermal filler based on calcium hydroxylapatite. It restores volume to hollow areas and redefines the jawline while naturally stimulating collagen production. The treatment improves the firmness and elasticity of the skin, delivering a gradual and lasting rejuvenation.

- **Duration:** 30 to 60 minutes under local anaesthesia (if required)
- **Recovery:** immediate; visible results after a few weeks
- **Results:** appear within 2 to 3 months and last up to 18 months to 2 years. One to two sessions are generally recommended, depending on the desired result

FROM €450

Indicative pricing — varies according to the procedure.

Profhilo®

Profhilo® is an injection of ultra-pure hyaluronic acid designed to improve skin quality rather than to add volume. It stimulates the natural production of collagen and elastin for firmer, smoother, more luminous skin.

- **Duration:** 30 minutes
- **Recovery:** immediate, with no social downtime
- **Results:** optimal after 2 sessions spaced 4 weeks apart, with effects lasting up to 6 months

FROM €350

Indicative pricing — varies according to the procedure.

Skin Treatments

Our aesthetic
medicine
treatments deliver
natural-looking
results with minimal
downtime, allowing
you to return
to your daily
activities
immediately.

Morpheus8®

Morpheus8® uses radiofrequency to effectively combat skin laxity on the face and body. Results appear quickly and continue to improve over the following weeks. Ideal after rapid weight loss, pregnancy, or simply as part of the ageing process, the treatment can also reduce cellulite, stretch marks and acne scars by stimulating collagen production.

- **Duration:** 30 minutes to 2 hours with a topical anaesthetic cream
- **Recovery:** a few hours to a few days
- **Results:** visible within 4 to 12 weeks

FROM €385

Indicative pricing — three sessions are generally recommended. Subscription option available.

Microneedling

Microneedling is a skin regeneration treatment that can significantly improve the appearance of the skin. It uses a pen-like device fitted with fine needles to create micro-perforations in the skin, triggering its natural repair response.

- **Duration:** approximately 45 minutes
- **Recovery:** immediate, with a transient sunburn-like effect that fades quickly
- **Results:** 3 to 4 sessions spaced two weeks apart are recommended for optimal results

FROM €125

Indicative pricing — varies according to the procedure.

FaceTite®

FaceTite® is a minimally invasive treatment that tightens the skin of the face and neck using bipolar radiofrequency. It addresses skin laxity without the need for major surgery, delivering natural and lasting results.

- **Duration:** 1 to 2 hours under local or general anaesthesia
- **Recovery:** 2 to 5 days
- **Results:** visible within 4 to 6 weeks, with continued improvement for up to 6 months

FROM €2,995

Indicative pricing — varies according to the procedure.

Exosomes

Exosomes represent a new generation of regenerative treatments. Acting as cellular messengers, they stimulate collagen and elastin production, support tissue repair and improve overall skin quality. They can be combined with microneedling or PRP to enhance results.

- **Duration:** approximately 45 minutes
- **Recovery:** minimal downtime, with mild transient redness
- **Results:** progressive improvement over 3 to 6 weeks

FROM €355

Indicative pricing — varies according to the procedure.

HydraFacial®

HydraFacial® is one of the world's leading facial treatments. It deeply cleanses the skin, gently exfoliates, extracts impurities and infuses nourishing serums. Results are visible from the very first session, revealing softer, smoother and more radiant skin.

Concerns it can treat:

- Superficial wrinkles and fine lines
- Uneven skin tone
- Irregular skin texture
- Hyperpigmentation
- Oily skin (excess sebum)
- Enlarged pores and blackheads

- **Duration:** 45 to 70 minutes
- **Procedure:** entirely painless
- **Frequency:** one session every 4 to 6 weeks is recommended
- **After the session:** make-up can be applied normally

FROM €155

Indicative pricing — subscription option available.

CO₂ laser

CO₂ laser is an effective treatment for visible signs of ageing. This non-surgical procedure uses laser energy to resurface and rejuvenate the skin. Whether your goal is to soften wrinkles, reduce acne scars or treat pigmentation, CO₂ laser offers a versatile and effective solution. Known for its precision and versatility, it can deliver noticeable skin improvement in a single session with long-lasting results.

- **Duration:** 30 minutes to 1 hr 30 min depending on the area
- **Sensation:** mild stinging and a slight burning sensation
- **Recovery:** significant redness from the treatment subsides within a few days
- **Results:** visible after one week and long-lasting with appropriate skincare

FROM €490

Indicative pricing — varies according to the procedure.

Vascular Laser

Vascular laser is a non-invasive solution that uses laser precision to specifically target blood vessels beneath the surface of the skin, treating vascular concerns effectively without damaging the surrounding tissue.

FROM €120

Chemical Peels

Chemical peels are aesthetic medicine treatments that can improve the appearance of your skin by stimulating the production of collagen and elastin.

- **Duration:** depends on the type of peel
- **Recovery:** immediate; more pronounced results visible after several sessions
- **Results:** duration depends on the type of peel, ranging from several months to several years

FROM €125

Indicative pricing — varies according to the procedure. A range of peels is available, from the lightest to the most intensive. Please consult us.

BodyTite®

BodyTite® is a radiofrequency technology used to tighten the skin and reshape the silhouette. It can be combined with liposuction for a more pronounced skin-tightening effect.

- **Duration:** 1 to 2 hours under general anaesthesia
- **Recovery:** minimal downtime (24 to 48 hours)
- **Results:** : visible after 2 to 3 months

FROM €3,265

Indicative pricing — varies according to the procedure.

LED Light Therapy

LED light therapy is a non-invasive treatment that uses light to stimulate skin cells, promote healing and soothe inflammation. Depending on the wavelength used, whether red, blue, yellow or green, LED light can target signs of ageing, acne, rosacea and post-procedure recovery.

- **Duration:** 20 to 30 minutes
- **Recovery:** immediate
- **Results:** visible after a course of 6 to 8 sessions

FROM €40 PER SESSION

Indicative pricing.

At Claris Clinic,
our teams, guided
by ethics and respect,
apply their expertise
to provide exceptional
medical care and
personalised attention,
offering a unique
and compassionate
healthcare experience.

The Body

At Claris Clinic, we use cutting-edge medical technologies to refine body contours, smooth the skin and create a more balanced, harmonious silhouette. Every treatment is tailored to your individual needs and designed to deliver visible, long-lasting results.

Cryolipolysis

Following a balanced diet and exercising regularly, but still struggling with stubborn areas of fat? It may be time to consider cryolipolysis.

This treatment uses controlled cooling to target and reduce localised fat deposits without damaging the skin or surrounding tissues. In selected cases, it may offer a safe and effective alternative to traditional liposuction.

- **Duration:** approximately 1 hr 10 min at -8°C with 1 to 3 sessions per area
- **Sensation:** mild discomfort or pain in the treated area is possible for a few days after the session
- **Results:** : visible after 6 weeks

FROM €325

Indicative pricing — one area per session.

How does
cryolipolysis work?

Laser Hair Removal

Dreaming of lastingly smooth skin, without the constraints of razors, wax or depilatory creams? Laser hair removal is the definitive solution you have been waiting for.

This technique precisely targets the hair follicles using light energy, destroying their ability to regrow without affecting the surrounding skin. It is suitable for all skin types and delivers lasting results from the very first sessions, making it a more cost-effective alternative to traditional hair removal methods over time.

- **Duration:** 15 minutes to 1 hr 30 min depending on the area in 6 to 8 sessions
- **Precautions:** avoid sun exposure and do not remove hairs in the 24 hours before the session

FROM €45

Indicative pricing — calculate your personalised quote on our website.

Hair Restoration

Hair Restoration

Rediscover stronger, denser, naturally revitalised hair. Our treatments stimulate regrowth, slow hair loss and restore vitality to the scalp.

FUE Hair Transplant

Follicular Unit Extraction (FUE) is a hair transplant technique that delivers natural, definitive results, suitable for both men and women. It involves transferring hair follicles from a donor area where hair is dense to a thinning or balding area. Each follicle is harvested individually using a precision instrument, allowing meticulous placement and optimal respect of hair density. The technique also offers great flexibility, adapting to targeted areas to deliver a tailored, harmonious result.

- **Duration:** 6 to 8 hours under local anaesthesia
- **Complementary treatment:** PRP is recommended after the procedure; follow-up consultations are required
- **Results:** significant hair growth within 6 to 12 months

PRICE: ON QUOTATION

Precise pricing on request, following consultation.

PRP for Hair

Platelet-Rich Plasma (PRP) harnesses the growth factors present in your own blood to halt hair loss, increase density and stimulate regrowth. New blood vessels also develop, further improving the health of the scalp.

A complementary technique may also include stem cells. This treatment is ideal for densifying the hair mass, halting hair loss, or addressing early-stage baldness.

- **Duration:** 30 to 40 minutes for the preliminary scalp analysis; optional local anaesthesia
- **Procedure:** standard blood sample, with plasma extracted by centrifugation
- **Results:** after a few weeks: softer, thicker hair; reduced shedding and visible regrowth
- **Sessions:** 1 to 3 sessions, spaced six months apart

FROM €395

Depending on the procedure (estimated price)

Package (3 sessions): €1,095 (estimated price)

PRP + Exosomes

This treatment combines Platelet-Rich Plasma (PRP) with exosomes to stimulate hair regrowth synergistically. It acts simultaneously on follicle nutrition, microcirculation and cellular regeneration, with a visible improvement in hair density and thickness.

- **Duration:** 45 to 60 minutes
- **Recovery:** immediate
- **Results:** after 3 to 4 sessions spaced 4 weeks apart

FROM €645

Indicative pricing — varies according to the procedure.
